Exceeding Your Expectations

Welcome

When our company opened in 1991 as part of Wagner Group, we adopted a simple philosophy: all work we do must be exactly the same quality as if it was for our own home, office, or business, and that includes every piece of hardware or equipment.

We are fully licensed and insured and each member of our installation team is trained regularly by experts from industry associations and manufacturers. Our specialties include Home Theaters, Lighting Controls, Shading Systems, Whole House Music, Automation Systems — state-of-the-art technology that can make your home or work-place more entertaining, comfortable, safe and productive.

Thank you for considering Wagner Technology for your entertainment and automation needs.

Drew and Carla Bardagjy

Movies, sports, digital TV. Anywhere in your home — a family room where your theater system disappears when not in use, a kitchen/den to follow the game or a master bedroom with a flat HDTV on the wall.

Our world-class collection of video projectors, concealing screens, flat display HDTV's and surround sound systems are selected on performance, ease of use, reliability and value. It is a thrilling experience when the screen appears at the touch of a button.

Media Rooms

Home Theater

A Home Theater is a wonderful place to relax and spend time with your family without the hassle of a trip to the multiplex. It's also a safe environment for your children to get together with their friends, right in the comfort of your home.

We help you realize your theater dreams from design, through construction, to the installation of the finest equipment available.

We provide all the audio and video, custom cabinetry, acoustical treatments, automated draperies, lighting control, theater seating, theater theme art and even the traditional popcorn maker.

Home Theater

Whole House Audio

Walk into a room, touch a button on a wall-mounted keypad and your choice of music from radio, CD, iPod or server begins to play.

The system plays your favorite selections or you can turn on the nearest TV and peruse your entire music collection on screen. It's like having a personalized music butler in every room. You can even hear different musical selections in different areas of your home simultaneously. Indoors, outdoors, in the shower or the driveway, tell us what you want and it's done.

It will be carefully planned with performance, appearance and craftsmanship in mind.

If your home was compared to a Picasso, your furnishings would be the canvas, the lighting fixtures would be the paint and the way you control that light would be the brushstrokes. We are experts in brushstrokes. Engraved keypads control preset lighting: "Day", "Night", "Entertain" and "Off" for example. All lights can be turned on or off from any keypad. Lighting control also provides safety in your home. From your telephone, you contact your home before arriving. The exterior lights brighten, the garage door opens and lights illuminate all pathways making your arrival secure.

Lighting Controls

Commercial

Whether your business needs are for lighting control for your restaurant, automated shading systems for energy conservation, background music for your hotel lobby, flat display HDTV's for your Sports Bar, or complete electronic building integration, we can design a system to meet your needs and your budget.

We incorporate the most advanced digital equipment. Each component we select is worthy of withstanding the rigors of commercial usage. Our systems deliver maximum flexibility, so as your business grows, your audio/video system can grow with you.

Corporate

The directors and managers are all seated. You touch one button. The overhead lights fade and the window shades adjust automatically. A stunningly clear image fills the screen. The soundtrack swells. Your audience is mesmerized by every image, enthralled by the presentation. They get it.

We specialize in one-touch presentation systems for boardrooms, offices and training centers.

We supply the audio/video, conferencing, lighting, window coverings and furniture. Most equipment disappears when not in use.

Watershed decisions are born in the Boardroom. Be sure yours is always ready.

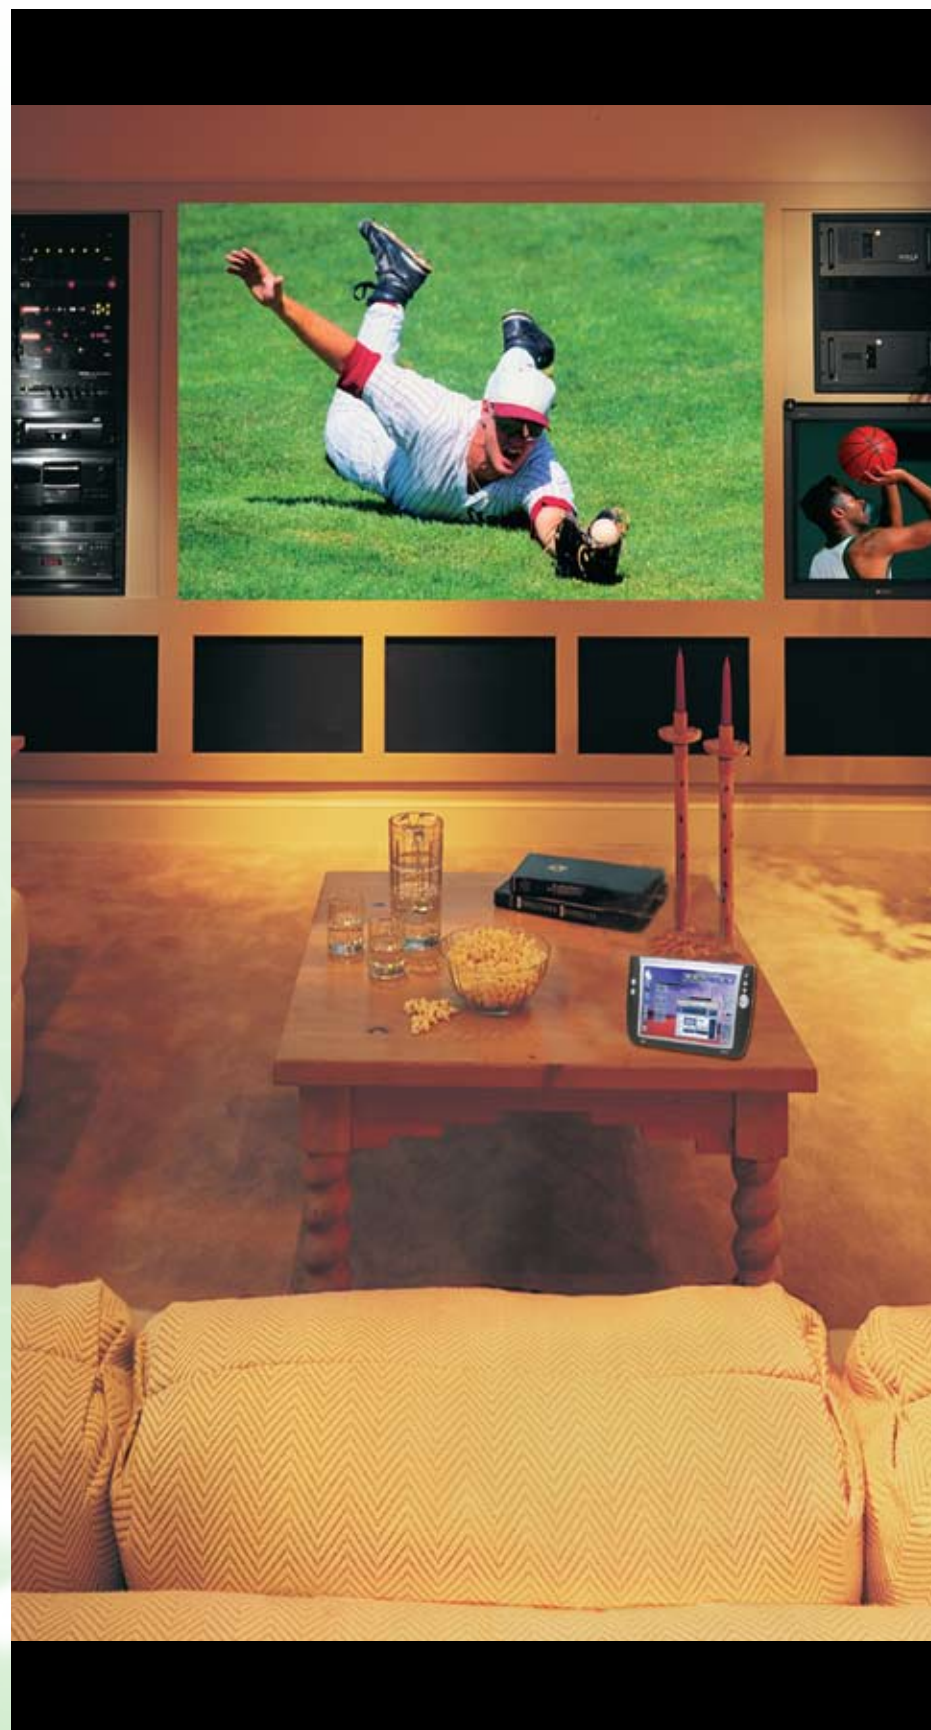

Control Systems

A home control system keeps your home electronics at your command, not the other way around! Your electronics will function perfectly in sync all from one simple-to-use touch screen.

Your touch screen is designed and programmed precisely to your needs. It integrates the control of your home electronics including every home theater and music component and your entire movie and music library. No more piles of remote controls with tiny buttons to navigate.

Just one easy-to-use screen.

Wagner Technology offers the utmost in performance and simplicity. Your system designer and project manager work through each detail, from the size of the room to the selection of audio/video equipment, lighting, power and safety requirements.

We have received numerous awards from industry trade associations and have earned Elite Dealer status from many manufacturers.

Your project schedule is adjusted to the needs of the architects, interior designers and contractors. All programming is done by our in-house specialists to ensure flawless operation. Your equipment is installed and calibrated by technicians with the utmost consideration.

Afterward, you can rest assured with our service contracts and scheduled system maintenance.
